Bob Garrett
Garrett Laboratories, Inc.
408 North 3rd Street
Niles, MI 49120

Laboratory No: 8003

Dear Bob Garrett:

SUBJECT: On-Site Evaluation

An on-site evaluation of Garrett Laboratories, Inc. was conducted on April 13, 2023. The purpose was to determine whether the equipment and procedures employed in the analysis of drinking water complied with the mandatory criteria for the certification of laboratories by the Department of Environment, Great Lakes, and Energy (EGLE). The findings contained in the enclosed report were noted during the survey. No informal advice, guidance, suggestions, and comments by the inspector, or any writing submitted by the laboratory will be construed as relieving the laboratory of any regulatory requirement. The laboratory is responsible for adhering to state and federal laws, associated administrative rules, and maintaining compliance with the specific method requirements for the methods listed on their certification letter.

Submit satisfactory written evidence of corrective action for the findings noted within 30 days of receipt of this letter. **In your response, include any supporting documentation necessary to substantiate that the corrective actions have been implemented. Failure to reply within the specified time period may result in the lapsing of your laboratory's certification.** We will issue a decision regarding your laboratory's official certification status after review of the corrective action submitted.

The current certification of your laboratory has been extended to August 1, 2023, to allow for the completion of the certification process. If you have questions regarding this information, please contact me by phone at 517-930-7040 or by email at lundyg@michigan.gov.

Sincerely,

Gregg A. Lundy
Laboratory Certification Officer
